

STEM Reflection and Summary

Answer the questions fully, using as much space as needed. Refer to the scoring rubric for how the reflection will be scored.

1. Explain how has this experience helped you with exploring your interests.
2. Describe the most enjoyable part of the experience.
3. Describe the least enjoyable part of the experience.
4. Describe the level of challenge this experience provided, and if you were not challenged to a high degree, what would you change about the experience?
5. If you were not challenged to a high degree, have you taken any steps to improve your experience?
6. What is your new understanding of the importance of education as related to the project?
7. What is something you did that you think you will remember for the rest of you life?
8. What is something that you are proud of accomplishing?
9. What advice would you give to other students that attempt this type of experience?

10. Additional question for Service Learning: Explain what you learned about the importance of service and your ability to make a difference. How likely are you to engage in service again?
